

<b>Feature</b>	<b>Benefit</b>	<b>Advantages</b>
Our product has...	Which...	And that means...
Waterproof Design	Keeps workers dry doing their work	The worker will be comfortable and able to work longer when it is raining and get the job done.
Flame Resistant to Flash Fire and Arc Flash	Protects workers in their environment where flame hazards exist	Since it is dual protected, you don't have to consider which thermal hazard you are protected against.
Chemical Splash Protection	Protects against incidental contact with chemicals	Offers protection from many of the chemicals commonly used by utility companies. One product for multiple hazards.
High visibility option for ANSI 107 Compliance.	Protect your workers in environments that require high visibility especially in low light applications	Safety vest do not need to be worn over rainwear to keep your workers safe and compliant.
Breathable, waterproof, windproof membrane	Maximize comfort when worn since it is managing the sweat the body is generating while protecting from rain and wind.	Workers are more comfortable while they are doing their job and it is comfortable enough to use as more than just rainwear. Multi-season use.
Blended Material	Provide a soft and very durable inherently FR material to workers that will ensure flame resistant protection.	Workers enjoy superior comfort and protection yet have the durability and flexibility expected to get the job done.
Economic Design: Pockets, Zipper Front, Sleeve Take Up, Fall Protection Access	Provides the necessary features to be safe and get the job done efficiently.	Workers stay comfortable and do not have to work around their outerwear. ArcJoule™ works around their uniform and PPE needs.
High Durability	Replace less rainwear over time	You will save money on your rainwear expenses.
Long Sizes Available	Properly fit your entire workforce	Workers can wear garments that fit them properly making them more comfortable.
Overall Multi-Hazard Design combining durability and comfort	The proper protection and greater comfort to workers doing their jobs	Workers will be more satisfied and willing to wear their rainwear. It will also provide a cost saving since there will be less replacements.
