

Feature	Benefit	Advantages
Our product has ...	Which ...	And that means ...
Waterproof Design	Keeps workers dry doing their work.	Your workers will be comfortable and able to work longer when it is raining and tasks need to get done.
Flame Resistant to Flash Fire and Arc Flash	Protects workers in their environment where flame hazards exist.	Since it is dual protected, you don't have to consider which flame hazard your protected against.
Chemical Splash Protection	Protects against incidental contact with chemicals.	You can expand the use of the PetroStorm to applications you would need other chemical garments for. One product for multiple hazards.
Extremely Lightweight	Maximizes worker comfort due to the reduction of uniform weight the body has to carry. This offers relief in hot conditions where heat stress is a concern.	Workers stay comfortable and productive in their working conditions.
Soft CCT Coating	Soft and comfortable to the user and reduces the heat build-up associated with other coated fabric.	Workers are more comfortable while they are doing their job and reduces the surface heat build-up, preventing workers from getting overheated.
Inherent FR Substrate	Provides a soft and very durable inherent material to workers that will ensure flame resistant protection.	You can provide a comfortable rain suit that will insure adequate FR protection for the life of the garment.
Sizing options available from S-5XL and Longs and Talls	Workers can be correctly sized for rainwear that fits.	Workers are more willing to wear their rainwear and are going to be adequately protected and comfortable.
High Durability	Replace less rainwear over time.	Save money on your rainwear expenses.
High Visibility option for ANSI 107 Compliance	Protect your workers in environments that require high visibility especially in low light applications.	Safety vests do not need to be worn over rainwear to keep your workers safe and compliant.
Overall multi-hazard design combing durability and comfort	Is the proper protection and greater comfort to workers doing their jobs.	Workers will be more satisfied and willing to wear their rainwear. It will also provide a cost saving since there will be fewer replacements.
